Delock USB 2.0 Sharing Switch 4 – 1

Description

This Delock Sharing Switch can be used on four computers to provide access to a single USB device. For example, if a printer is connected, it can be selected by the help of the buttons on the switch, which of the four computers is connected to the printer. This connection can be switched anytime. The package content includes a software for Windows Vista and 7, which allows to shift the switch by software.
