

PCI Card > 1x PCMCIA CardBus

Description

This Delock PCI card gives you a PCMCIA slot on the back of your PC. The PCMCIA transfer rate is 16 bit (PC-Card) and 32 bit (Card Bus), supply voltage is 3.3V or 5V. The advantage of this PCI card is that you can use additional PC-Cards or card bus PCMCIA adapters like Wireless LAN, Bluetooth, USB adaptor, FireWire adaptor, card reader, 10/100 LAN, etc. on your PC.
