

Delock HDMI Video Capture Stick USB Type-A

Description

This **HDMI capture** stick by Delock can be used to transfer video signals, for example from a digital camera to a PC.

USB Video Class (UVC) standard

The connected computer or tablet / smartphone treats the input camera signal like a **webcam**, making the device excellent for **video conferencing or live streaming** when used together with a camcorder or action cam.

HDMI video and audio capture

The capture stick allows recording from HDMI sources with a maximum of 4K @ 30 Hz resolution; the recording is compressed up to 1080p at 30 Hz.

Note

- The output of a stereo signal is mono summed.
- Videos with HDCP copy protection cannot be recorded.
