

Shark Fin Antenna with LTE + WLAN + GNSS multiband

Description

This multiband antenna by Delock is designed for **mounting on a car roof**.

The so-called **shark fin** antenna has **three different frequency bands**. The GPS patch antenna receives the signals of the Global Navigation Satellite Systems **GALILEO and GPS**. And it also works in all common **LTE** bands. The 2.4 GHz frequency band also covers the **WLAN** range.

Stylish and functional

The modern design of this shark fin antenna not only looks good, but is also particularly stable and aerodynamic.
