

Delock Stripping Tool for coaxial cables with 3 blades

Description

This stripping tool by Delock can be used to strip coaxial cables.

Easy to use

Thanks to the three blades inside the tool, it is possible to strip the outer sheathing, the shielding and the inner conductor insulation of round cables (RG-6, RG-59, RG-58), in one step. The blades can be adjusted to the desired height, with the removable allen key, which is stowed in the tool.

Changing the stripping length

The blades can be varied in their position by using the bolt on the side, which is removable. Not only the height but also the length of the stripping can be determined individually.

Practical handling

The fluted handle and ergonomic design of this tool fits perfectly in the hand. One-handed working is possible due to the metal spring inside the handle.

Item no. 90512

EAN: 4043619905126

Country of origin: China

Package: Blister

Specification

- Adjustable for cable diameters up to 12.0 mm
- Suitable cables for stripping: RG-6, RG-59, RG-58
- Colour: grey
- Dimensions (LxWxH): ca. 10.8 x 4.7 x 2.4 cm

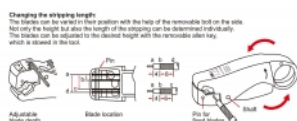

System requirements

- Suitable cables for stripping

Package content

- Cable stripper
- Allen key
